

Oran Precast supply Major Development in Naas Co. Kildare

Oran Precast have recently installed over 16,000 sq. m. of precast concrete frame to a major mixed development in Naas Co. Kildare. The Kildare Estates complex comprises offices, hotel, and leisure facilities as well as apartment and housing

accommodation. The development has an underground car park and crèche facilities. The contract was awarded to Oran Precast primarily because of savings in construction time which was estimated to be in the order of 25-35% compared to

insitu concrete. Health and Safety advantages, due to the small number of operatives required on site, was also a consideration. A full package of precast elements was supplied by Oran Precast, including precast columns, beams and hollowcore flooring.
