

O'Reilly Bros. Ltd. - Pre-stressed tongued and grooved wall plank

O'Reilly Bros. Ltd. Co. Cavan have recently developed a pre-stressed tongue and grooved plank wall panel system suitable for garden wall and industrial/commercial applications. The advantages of the system include substantial time-savings in installation (up to 75% compared to traditional block walls) and cost savings of up to 30%. The system is particularly advantageous where either large areas of wall or where load bearing/retaining walls are required.

Panels are typically manufactured in sizes of 6.00m x 1.20m x 0.14m thick. Each panel is installed horizontally into a
