

Techrete develop  
terracotta coloured  
reconstructed  
stone & brick  
faced panels

Glasnevin's new Addison Park precast concrete residential development features almost 2,500 sq. m of precast terracotta stone panels supplied by Techrete Ltd. The reconstituted stone panels have an etched finished and are produce in a warm terracotta colour in accordance with the specific requirements of the designers 'O Mahony Pike Architects.

Addison Park is also the first project in Ireland on which brick-faced precast panels have been used. The brick panels which are 8m<sup>2</sup> in size are located on the gable walls have a 150mm concrete backing with a 20mm applied brick facing. Techrete's brick- faced panels have also been used successfully on the Centerpoint development in Tallaght Co. Dublin.
