**Wideslab (Plate) Flooring - The Quinn Group**

The Precast section of the Quinn Group recently completed its biggest ever project - The Bow Street Mall, Lisburn, Co. Antrim. The project which comprised 20,500 sq.m of prestressed plate flooring, was supplied and installed in a record 10 week period on a 3 storey steel-framed building. This equates to average daily installation rate in the order of 400 to 450sq.m per day. To achieve this 'high volume' installation, first floor units were installed using a lorry mounted HIABS 175 hoist, while second and third floor precast units were installed using cranes working in tandem.
